Portfolio

Education

Jain (Deemed-to-be University)

B.Tech in Computer Science and System Engineering

2019 – 2023

GPA: 8.1 / 10

Technical Skills

Languages: Go, Python, TypeScript, JavaScript, Java, C++, SQL

Backend: Goa v3, gRPC (protobuf), Django, DRF, FastAPI, SQLAlchemy, Spring Boot, Node.js, GORM, JWT, RBAC, WebSockets

Frontend / Infra: React 18, Next.js, Vite, Tailwind | GCP, Docker, Kubernetes (GKE), Nginx, GitHub Actions, Artifact Registry

Databases / Observability: PostgreSQL, Redis, SQLite, MongoDB | Prometheus, OpenTelemetry, Sentry

AI / ML: Claude API, Claude Code, Cursor, MCP, multi-LLM orchestration, PyTorch, transformers, scikit-learn, pandas

Experience

Spring Street

Nov 2025 – Present

Founding / Platform Engineer (Full-Stack)

On-site, Mumbai

- **Built the broker-grade fintech platform from scratch** as the founding engineer — backend, frontend, infrastructure, CI/CD, and observability owned end-to-end.
- Migrated transport from **Goa HTTP to gRPC (protobuf)** for tighter contracts and lower payloads; designed schema evolution across services.
- Implemented real-time **portfolio + order streaming over WebSockets** and an **exactly-once outbox** with reconciliation for trading ops.
- Built secure auth: **JWT, refresh-token rotation, RBAC, broker impersonation**; provisioned **GKE on GCP** via Docker + GitHub Actions + Artifact Registry; instrumented **Prometheus + OpenTelemetry**.
- Optimized React 18 + Vite frontend with code-splitting and lazy loading, reducing bundle size by **40–50%**.

Wright Research

Dec 2023 – Feb 2026

Software Engineer (Full-Stack / Platform)

Remote

- Architected and scaled **Django + DRF backend** powering portfolio management and mutual fund analytics for **25,000+ users**; led/mentored **5+ interns and juniors**.
- Cut dashboard queries by **60–80%** via routing, indexing, query optimization; migrated cache to **Redis (70–85% hit)**, reducing API latency **2–3s -> <500ms**.
- Built the **Mutual Fund Review system** end-to-end — **1000+ portfolios** processed with risk, diversification, and benchmark analysis.
- Drove perf wins: PageSpeed **75+ mobile / 90+ desktop**, LCP **–40%**, CLS **0.27 -> <0.1**, page weight **–15–20MB**.
- Remediated **CERT-In** findings + OWASP **A2/A3/A5/A7/A10** via session invalidation, CSP, HSTS, secure headers, audit logging.
- Owned **production ops on GCP** (Nginx, Gunicorn, Redis, Cloud CDN, Sentry); **99.9% uptime**, MTTR **–30%**.

Floworx

Sept 2023 – Nov 2023

Junior Software Engineer

Bengaluru

- Built backend APIs in **Node.js, Express, TypeScript, PostgreSQL**; documented **Spring Boot** APIs with Swagger.

Projects

Njord — Personal Finance Tracker

Go, SQLite, Telegram Bot API, systemd

- Self-hosted finance tracker for the Indian banking ecosystem with idempotent ingestion + modular per-bank parsers; single Go binary on a **\$5/mo droplet**; daily-driver since 2025.

Globradar — AI Market Intelligence

Python, Claude API, multi-LLM workflows

- Bloomberg-style market intelligence + alerting; **multi-LLM split** (Sonnet for reasoning, Haiku for high-volume enrichment) with streaming alert workflow.

Achievements

Smart India Hackathon

2022

Grand Finalist

- Led an AI-driven pronunciation correction system under a Ministry of Defence problem statement.
